VABISHYA

Career Path Planner

*A stepwise map of Indian education routes,
exams, professions, and weekly practice.*

Compiled and published by Smruti Ranjan Sahoo

© 2026 Smruti Ranjan Sahoo. A Vabishya digital edition.

Four streams, four colours — pick a syllabus you can inhabit.

Digital edition · 100 pages · For Class 10 to first job

Confirm every exam date, fee, and eligibility from the official bulletin. This book is a planner, not a counselling order or a guarantee of a seat.

Copyright and how to use this book

Career Path Planner is a Vabishya digital edition, compiled and published by smruti ranjan sahuo. © 2026 Smruti Ranjan Sahoo. A Vabishya digital edition. You may print it for personal study. You may not sell the file, upload it as a course, or present it as official counselling.

Dates move. Institutes rewrite rules. A page that was right in March can be wrong in April. Whenever this book names an exam, treat the sentence as a prompt to open the current information bulletin.

Work the worksheets in pencil. The value of the book is not that it is 100 pages long. The value is that page 67 still has your handwriting on it in November.

A simple weekly rhythm

- Monday: one hour on the path you chose — syllabus or skill, not browsing
- Wednesday: one conversation or one official page, written down
- Friday: one mock, drill, or portfolio artefact
- Sunday: fifteen minutes on the decision log and the week grid

What this book will not do

It will not pick a stream for you. It will not promise an IIT, an MBBS seat, or a campus package. It will not replace a licensed counsellor if you are in distress. If studies have become a health problem, talk to a trusted adult and a professional. A career plan can wait a week. You cannot.

The first real choice is which two-year workshop you will sit in.

PART I

Streams and the first fork

Class 11 is a door, not a personality. Choose a syllabus you can inhabit for two years.

The Indian education spine

Almost every formal Indian career still walks a familiar spine: Class 10, a Class 12 stream, an entrance or merit list, a degree or diploma, then a licence, articleship, internship, or first job. The spine is not oppression. It is a map. You can step off it — open-source careers, sport, family business, creative work — but you should step off it on purpose.

Vabishya exists to show the stepwise version of that map: what comes after Metric, what a given profession usually expects, and which exams sit on the road. This book is the paper companion. Use the site to expand a path; use these pages to decide which path is yours.

Three mistakes show up in every school year. The first is choosing a stream to impress a relative. The second is choosing a stream to avoid a subject you could learn with help. The third is choosing no stream at all and waiting for Class 12 summer. Start the conversation in Class 10 winter.

Class 10 is a sorting year, not a verdict

Boards matter because they are a common language. They do not measure curiosity, stamina, or kindness — the traits that keep a profession alive at thirty. Treat Class 10 as a fitness test: can you finish a syllabus, sit an exam, and recover?

If a subject collapsed this year, ask whether the cause was teaching, attendance, language, or dislike. Those four causes want four different next moves. A tutor fixes the first. A timetable fixes the second. A medium-of-instruction change is rarer and serious. Dislike, if it survives honest effort, is data for the stream choice.

PCM — Physics, Chemistry, Mathematics

PCM is a workshop: numbers, models, and experiments you can explain.

PCM is the most crowded Class 12 route in India because it keeps engineering, architecture, defence, pure science, and many design-adjacent doors open. It is not the only intelligent choice. It is the right choice when you can sit with numbers for two years without dreading every problem set.

A strong PCM student is not the one who memorizes formulae. It is the one who can explain why a beam bends, why an acid reacts, and how a limit becomes a slope. Entrance exams reward that habit.

Typical next hops: JEE Main and Advanced, state CETs, BITSAT, NATA for architecture, NDA, and later GATE if you stay in engineering. Cost bands vary wildly: a government B.Tech can be modest; a private campus can run into several lakhs a year.

Protect your Class 12 board marks. Many state counselling processes still use them. Do not treat boards as a distraction from JEE — treat them as a second exam that uses the same syllabus.

- Daily: 1 timed maths paper + 1 physics numerical block
- Weekly: one full mock and a written error log
- Keep chemistry NCERT line-by-line; it is still the cheapest mark bank
- If maths is a struggle by October of Class 11, add a tutor or change the target

PCB — Physics, Chemistry, Biology

PCB is a living syllabus: bodies, plants, and the clinic at the end of the road.

PCB is the clinical corridor: MBBS, BDS, BAMS, BHMS, B.Sc Nursing, physiotherapy, pharmacy, biotechnology, and a growing set of allied-health degrees. NEET UG is the gate for the medical college seats. It is a rank exam, not a pass-fail exam, which means your relative standing matters more than a raw score.

Biology in NEET is still rooted in NCERT. Students who treat the textbook as optional lose easy marks. Physics and chemistry decide the rank once biology is saturated.

If you want medicine but cannot face six years plus internship plus residency, write that down now. Nursing, physiotherapy, and optometry are not consolation prizes; they are licensed professions with their own dignity and demand.

A PCB student who later wants engineering will usually need mathematics. Do not drop maths casually if you are undecided between medicine and research.

- Read NCERT biology twice before any reference book
- Keep a diagram notebook — examiners love labelled figures
- Plan a drop year only with a written budget and a mock-score gate
- Visit one hospital or clinic before you lock MBBS as identity

Commerce — Accounts, Business, Economics

Commerce starts in a real shop and ends in a ledger someone else will trust.

Commerce is the language of firms, tax, and markets. It leads to CA, CS, CMA, B.Com, BBA, economics honours, banking, and a large private-sector hiring pool. The mistake is to treat it as the 'easy stream'. Accounts is a craft. Economics is a way of seeing trade-offs. Business studies is only useful if you can connect it to a real shop or a listed company.

CA Foundation can be attempted after Class 12. Many students begin coaching in Class 11. That is optional. What is not optional is comfort with journals, ledgers, and GST at a basic level.

CUET has become a major door to central universities for B.Com and BBA. State universities still run their own merit lists. Keep both calendars.

If you dislike sitting with numbers but like people and stories, commerce can still work through marketing, HR, and operations — but you will need internships to prove it.

- Maintain a mock ledger for a fictional kirana shop
- Read one company annual-report summary each month
- Decide CA / CS / CMA / campus degree by the winter of Class 12
- Learn spreadsheets early; they are the workshop of this stream

Arts / Humanities — History, Political Science, Languages, Psychology

Arts is a reading life: arguments, stories, and public rooms.

Arts is the most misunderstood stream in Indian families. It is the native route to law, civil services, journalism, design theory, teaching, psychology, social work, and a wide range of public-policy roles. It is not a leftover stream. It is a reading stream.

CLAT and other law tests sit on comprehension, legal reasoning, and current affairs. UPSC is years away, but the reading habit starts now. Psychology and economics combinations are increasingly useful.

The risk in Arts is vagueness. 'I will do something in humanities' is not a plan. Name a profession, a degree, and an exam. Then the stream becomes a tool instead of a fog.

Languages, if you are strong in one, can become translation, content, teaching, or the foreign-service language papers later. Do not abandon a language you actually love.

- Read one quality newspaper editorial every day, on paper if you can

- Write 200 words of summary, not highlight-and-forget
- Pair the stream with a concrete degree: BA LLB, BA Economics, B.Des, B.El.Ed
- Build a portfolio of essays or design work by Class 12

Papers are weather. A mock schedule is climate.

PART II

Entrance exams without mythology

*An exam is a filter with a date. Learn the filter, then practise
the date.*

How to read any information bulletin

Read the bulletin. WhatsApp forwards are not a syllabus.

Every serious Indian entrance exam publishes a bulletin: eligibility, pattern, fees, cities, and rules for calculators, dress, and documents. Students lose years to WhatsApp forwards. The bulletin is boring on purpose. Read the contents page, the eligibility, the pattern, and the important dates. Write those four onto the exam-calendar worksheet later in this book.

A healthy exam plan has three layers. Layer one is the official syllabus. Layer two is a question bank you will finish. Layer three is a mock schedule you will not negotiate away in January. Books you will not finish are furniture.

JEE Main and Advanced

JEE Main is the gateway to NITs, IIITs, and GFTIs, and the qualifier for JEE Advanced. Advanced is the IIT door. Both are now computer-based. Dates usually fall in two Main sessions (often January and April) and Advanced in May or June.

The syllabus is Class 11 and 12 PCM. Students who skip Class 11 gravely and try to 'finish the course' in Class 12 repeat the same chapters under panic. A saner plan is to close Class 11 by February of that year and spend Class 12 on revision plus mocks.

Rank matters more than marks. A 99 percentile in Main is a different world from 95. Know the previous-year opening ranks for the branches you actually want, not the branches your relatives want.

State CETs (MHT CET, KCET, EAMCET, WBJEE, and others) are parallel doors. Many good careers never touch an IIT campus. Write those doors on your calendar so one bad Main day does not feel like the end of engineering.

NEET UG

NEET UG is a single-day, pen-and-paper exam for MBBS, BDS, and several other medical seats. It uses Physics, Chemistry, and Biology from the NCERT-centred syllabus. Cut-offs move every year with the paper and the candidate count.

Counselling is a second exam. AIQ and state quotas, category ranks, and bond rules can matter as much as the score. Read the information bulletin the week it is published. Families lose seats to paperwork more often than they admit.

A drop year is common. It is also expensive in money and mood. Set a mock-score gate in December. If you are not near last year's cut-off band by then, revisit nursing, physiotherapy, pharmacy, or a B.Sc route instead of drifting into a second unfocused drop.

CUET UG

CUET UG is the common door to many central universities and a growing list of other campuses. It is domain-subject plus language plus a general test, depending on the programme. That means your Class 12 subjects suddenly matter for admissions that once used

only board percentages.

Pick universities before you pick papers. A student who wants B.A. (Hons) Political Science at one campus and B.Com at another may need different domain tests. The information bulletin is dull and mandatory.

CUET does not replace every state process. Keep your home-state university calendar anyway.

CLAT and law admissions

CLAT feeds the National Law Universities for the five-year B.A. LL.B. Other tests (AILET, SLAT, state law CETs) sit beside it. The paper rewards reading speed, legal aptitude, logical reasoning, and quantitative techniques at a modest level.

You do not need Class 12 law coaching for years. You need comprehension practice and a habit of reading judgments in plain English summaries. Current affairs help, but they are not a GK dump.

Law is a profession of language and stamina. If you dislike reading for two hours, believe that signal.

CA, CS, and CMA

These are institute-run professional routes, not campus degrees — though many students do both. CA Foundation, Intermediate, and Final are staged. So are CS and CMA. Pass

percentages are low because the standard is a working professional's standard, not a college internal.

Articleship is the real classroom. A rank without articleship discipline is an incomplete qualification. Talk to two articleed assistants before you treat the prospectus as destiny.

Foundation after Class 12 is the common entry. Direct entry exists for graduates under institute rules. Confirm the current ICAI / ICSI / ICMAI notification; they change.

NDA, CDS, and defence academies

NDA is open after Class 12 for the Army, Navy, and Air Force wings, with UPSC written papers and Services Selection Board. CDS is the graduate door. NDA is not a backup for students who missed JEE. It is a service career with its own physical, medical, and character filters.

Written marks get you to SSB. SSB looks at Officer-Like Qualities over five days. Coaching can familiarise you with the format. It cannot invent a personality you have not practised in school — responsibility, teamwork, and clear speech.

Medical standards are strict, especially for flying branches. Get an honest medical read early if that is the dream.

NATA, NID, NIFT, and design

Architecture uses NATA or JEE Paper 2 depending on the campus. Design uses NID DAT, UCEED, NIFT, and a swarm of

private tests. Portfolios matter more here than in engineering. A sketchbook you have used for a year beats a two-week crash course.

Design is not 'drawing pretty things'. It is problem-solving with form, material, and user. If you cannot explain a chair you redesigned, you are not ready for the studio critique culture.

GATE, CAT, and later-life exams

Some exams arrive after a degree. GATE is the M.Tech and many PSU door. CAT, XAT, and SNAP are MBA doors. UPSC CSE is a graduate exam with a long runway. You do not need to decide them in Class 10. You do need to know they exist so you do not treat the first degree as the last credential.

The healthy stance: pick a first profession you can enter, then keep one later exam as an option, not an identity.

Titles fade. The weekly texture stays.

PART III

Thirty professions, written plainly

*A profession is a repeated week, not a title on a wedding
card.*

How to use these sketches

Each sketch names a typical school stream, a training route, the exams that usually sit on the road, and the texture of the work. Typical is not mandatory. Doctors have entered from unusual routes; engineers have become civil servants; commerce graduates write software. Use the sketch as a default spine, then check Vabishya or an official site for the exact hops.

When a sketch mentions cost or years, treat the numbers as order-of-magnitude. Private flying schools and private medical seats can be an order higher than government ones. Always ask for this year's prospectus.

Software engineer

Engineering work is built things, not just marks.

You turn problems into running systems. The job is less about typing and more about clarifying requirements, testing, and living with other people's code. A GitHub trail and one shipped project beat a certificate pile.

- Usual school door: PCM or later lateral entry
- Training spine: B.Tech / B.Sc CS, then internships
- Exams you will actually meet: JEE / CET / CUET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of software engineer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Data analyst / data scientist

You clean messy tables until a decision becomes obvious. SQL, spreadsheets, and one plotting tool will take you further than a fashionable course title.

- Usual school door: PCM or Commerce with maths
- Training spine: B.Tech, B.Stat, B.Sc Maths/Eco, then projects
- Exams you will actually meet: JEE / CUET / ISI / later GATE

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or

cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of data analyst / data scientist and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Doctor (MBBS)

Clinical lives are night duty and paperwork as much as the coat.

You will spend a decade becoming useful. Night duty, paperwork, and uncertainty are the job, not a side effect. Shadow a resident before you romanticise the white coat.

- Usual school door: PCB
- Training spine: NEET, MBBS, internship, then PG

- Exams you will actually meet: NEET UG, later NEET PG

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of doctor (mbbs) and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Dentist

Dentistry is a fine-motor clinical craft with a private-practice path. Manual skill and patient talk matter as much as biology ranks.

- Usual school door: PCB
- Training spine: NEET, BDS, internship
- Exams you will actually meet: NEET UG

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of dentist and disliking the weekly texture above. Status fades by the third year of training.

Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Nurse

Nursing is licensed, mobile, and in global demand. It is clinical work, not a fallback. Night shifts are real; so is the chance to specialise.

- Usual school door: PCB or vocational nursing
- Training spine: B.Sc Nursing or GNM, then registration
- Exams you will actually meet: State / national nursing tests

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of nurse and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Physiotherapist

You rebuild movement after injury. Empathy plus anatomy. Sports teams, ICUs, and neighbourhood clinics all hire.

- Usual school door: PCB
- Training spine: BPT, internship, then a clinic or hospital
- Exams you will actually meet: State / university admissions

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of physiotherapist and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Pharmacist

You sit at the junction of chemistry, regulation, and patient safety. Retail, hospital, and industry are different lives — pick one to sample.

- Usual school door: PCM or PCB
- Training spine: B.Pharm or D.Pharm, then registration

- Exams you will actually meet: State CETs / GPAT later

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of pharmacist and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Civil servant

You administer rules, money, and conflict. The exam is a reading marathon. The job is a people marathon. Intern with a local office if you can.

- Usual school door: Any stream, then a graduate degree
- Training spine: Bachelor's, then UPSC or state PSC
- Exams you will actually meet: UPSC CSE / state PSC

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of civil servant and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Lawyer

Law is a reading and waiting profession.

You write, argue, and wait. Litigation, firms, and counsel work feel different. Court internships in the second year tell the truth faster than brochures.

- Usual school door: Any stream; Arts helps
- Training spine: Five-year BA LLB or 3-year LLB after graduation
- Exams you will actually meet: CLAT / AILET / state tests

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write

what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of lawyer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Chartered accountant

Accounts is a craft other people will spend.

You attest numbers other people will spend. Articleship is the forge. Tax season will test sleep and accuracy together.

- Usual school door: Commerce preferred
- Training spine: Foundation, Intermediate, articleship, Final

- Exams you will actually meet: ICAI exams

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of chartered accountant and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Company secretary

You keep a company legal and governed. Board work, filings, and the Companies Act are the craft.

- Usual school door: Commerce preferred
- Training spine: CS programme plus training
- Exams you will actually meet: ICSI exams

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of company secretary and disliking the weekly texture above. Status fades by the third year of

training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Banker

Retail, credit, and markets are three jobs. Public-sector exams are a process; private banks hire for talk and targets.

- Usual school door: Any graduate stream
- Training spine: B.Com / BBA / any degree plus bank tests
- Exams you will actually meet: IBPS / SBI / RBI / campus

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of banker and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Architect

Studio culture, models, and late plots. You design spaces people inhabit. Site visits teach more than renders.

- Usual school door: PCM
- Training spine: NATA or JEE Paper 2, then B.Arch
- Exams you will actually meet: NATA / JEE

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of architect and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Civil engineer

Bridges, water, and housing. Sites are dusty and political. If you hate being outdoors, this is a mismatch.

- Usual school door: PCM
- Training spine: B.Tech Civil
- Exams you will actually meet: JEE / CET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of civil engineer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Mechanical engineer

Machines, heat, and manufacture. Core plants still hire; so do auto and robotics if you add projects.

- Usual school door: PCM
- Training spine: B.Tech Mechanical
- Exams you will actually meet: JEE / CET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of mechanical engineer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Electrical engineer

Power, chips, and embedded systems. Lab work and safety habits matter. A microcontroller project is a better story than a generic workshop.

- Usual school door: PCM
- Training spine: B.Tech Electrical / ECE
- Exams you will actually meet: JEE / CET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of electrical engineer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Commercial pilot

Expensive, regulated, and schedule-heavy. Get the medical first. Then talk to two first officers about debt and simulators.

- Usual school door: PCM, medical standards
- Training spine: CPL through a flying school, plus DGCA papers
- Exams you will actually meet: Class 1 medical, school tests

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of commercial pilot and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Teacher

Teaching is designed attention, rehearsed in real rooms.

You design other people's attention. It is performance plus planning. Classroom internships in year one, not after the degree.

- Usual school door: Any stream
- Training spine: B.El.Ed, B.Ed, or subject Master's plus TET
- Exams you will actually meet: CTET / state TET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of teacher and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Journalist

You report, not recycle. A published piece in a college paper is worth more than a media-degree brochure. Ethics are the job.

- Usual school door: Arts or any stream
- Training spine: B.A. Journalism / mass comm, plus clips
- Exams you will actually meet: CUET / university tests

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of journalist and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

UX / product designer

You watch people fail at software and fix the path. User tests beat opinions. Keep a case-study notebook.

- Usual school door: Any stream; design tests help
- Training spine: B.Des or a strong portfolio path
- Exams you will actually meet: NID / UCEED / NIFT

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of ux / product designer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Fashion designer

Pattern, cloth, and cost. Fashion week photos are marketing. The work is sampling and vendor calls.

- Usual school door: Any stream
- Training spine: NIFT / private fashion degrees
- Exams you will actually meet: NIFT / campus

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of fashion designer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Hotel / hospitality manager

Shifts, guests, and operations. Internships in a working hotel will confirm or kill the romance in one summer.

- Usual school door: Any stream
- Training spine: BHM / hospitality degrees
- Exams you will actually meet: NCHMCT / campus

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of hotel / hospitality manager and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Psychologist

Listening is trained, not innate. Clinical work needs further study. School and HR roles exist earlier.

- Usual school door: Arts or Science with psychology
- Training spine: B.A./B.Sc Psychology, then Master's and licence path
- Exams you will actually meet: CUET / university

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of psychologist and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Scientist / researcher

You live with unanswered questions. Labs are slow. Publish a student poster before you decide academia is the life.

- Usual school door: PCM or PCB
- Training spine: B.Sc / Integrated M.Sc / B.Tech, then NET or PhD
- Exams you will actually meet: NEST / IAT / JEE / GATE / NET

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write

what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of scientist / researcher and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Veterinarian

Animals, rural postings, and clinics. If you only like puppies and not livestock, say so early.

- Usual school door: PCB
- Training spine: NEET or state vet admissions, B.V.Sc
- Exams you will actually meet: NEET / state

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of veterinarian and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Armed forces officer

Command, risk, and service. Fitness is not optional. Family mobility is part of the contract.

- Usual school door: PCM for NDA technical; any for some entries
- Training spine: NDA, CDS, or technical entries
- Exams you will actually meet: UPSC NDA / CDS / SSB

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of armed forces officer and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Entrepreneur

You sell before you scale. Keep a day job or a tiny service until one customer pays twice. Accounts still matter.

- Usual school door: Any stream
- Training spine: No single degree; a first skill plus a customer

- Exams you will actually meet: None required

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of entrepreneur and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Actuary

Probability as a career. Insurance and risk. It is a long paper trail. Love maths or walk away.

- Usual school door: PCM or Commerce with maths
- Training spine: ACET plus institute papers
- Exams you will actually meet: ACET / IAI

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of actuary and disliking the weekly texture above. Status fades by the third year of training.

Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Physical education / sports coach

Training plans, injuries, and patience. Playing was the hobby. Coaching is pedagogy.

- Usual school door: Any stream; science helps
- Training spine: B.P.Ed / sports science, plus federation licences
- Exams you will actually meet: University / NIS pathways

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of physical education / sports coach and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Social worker

You work at the edge of policy and a family's worst week. NGOs and CSR teams hire. Burnout is occupational — plan rest.

- Usual school door: Arts or any stream
- Training spine: BSW / MSW
- Exams you will actually meet: University

A practical next step this month: speak to one person who does this work, and write five lines about a day they described — not the day you imagined. If you cannot find a person, read one official regulator page (NMC, BCI, ICAI, DGCA, AICTE, NCTE) and write what surprised you. Then add the profession to your shortlist or cross it off in the decision log. Either result is progress.

Common misfit: wanting the status of social worker and disliking the weekly texture above. Status fades by the third year of training. Texture stays. If the texture feels like a tax you will resent, keep looking. If it feels like a sport you could lose track of time inside, keep this page marked.

Write the year as four quarters, not as 365 days of grit.

PART IV

Plans that survive November

Motivation is a weather system. Systems are climate.

A twelve-month shape

If you are in Class 10, the next twelve months are stream choice, board revision, and one skill you can show. If you are in Class 11, they are syllabus completion and a first mock baseline. If you are in Class 12, they are mocks, forms, and a written backup. If you are in the first year of college, they are internships and not losing the thread of why you came.

Write the year as four quarters, not as 365 days of grit. Quarter one: close the last syllabus hole. Quarter two: raise mock frequency. Quarter three: forms, documents, and sleep. Quarter four: the exam and the counselling paperwork. Reward the quarter, not the mood of a Tuesday.

Money, loans, and scholarships

A career that bankrupts the household is a household event, not a personal brand. Sit with the money-ceiling worksheet before you fall in love with a private campus brochure. Education loans are tools. They are also EMIs during your first salary years. Ask what happens if the placement median is half the brochure number.

National Scholarship Portal, state minority and merit schemes, and campus waivers exist. They need documents you should gather in Class 11: ID, income, caste or EWS papers if they apply, and marksheets in one envelope.

Internships and the first job

The first workplace is a rehearsal, not a verdict.

The first job is rarely the dream job. It is proof you can finish work other people needed. Internships are the rehearsal. Write twenty names on the internship worksheet. Send ten polite emails. Expect silence. Send ten more. A two-week shadow at a clinic, a CA office, a newsroom, or a small software shop will teach more than a winter of highlight reels.

Resumes for students are one page. Education, two projects, one responsibility, skills you can demonstrate. The resume starter kit in the Vabishya store is a template. This paragraph is the rule: do not invent responsibilities you cannot talk about for two minutes.

When to change course

Change course when two of these three are true for a full term: your mocks are not moving, your body is getting worse, and you cannot describe why you still want the destination. One bad month is weather. Three bad months with no experiment (tutor, sleep, target change) is a plan that needs rewriting.

Changing course is not failure if you take the skills with you. A NEET year still taught you biology. A JEE year still taught you sitting with hard problems. Write what transfers on the backup-path worksheet so the year is not emotionally wasted.

Parents, relatives, and noise

Most Indian career fights are love wearing the wrong costume. A parent who pushes engineering may be pushing safety. Hear the safety. Then show a funded, examined alternative. A vague 'I want to do something creative' loses to a concrete 'NIFT + this fee + this backup B.Com'. Paper beats volume at the dinner table.

Relatives who have not held the job should get a time limit in the conversation, not a veto.

Pencil beats a highlight reel.

PART V

Write in the book

A planner you do not mark is a brochure.

Worksheet 1 · Values inventory

Write ten things you refuse to give up (city, income floor, creativity, service, status, outdoor work, nights off). Circle the three you will not trade. Every later choice must honour at least two.

Worksheet 2 · Energy log

For seven days, note two hours when you felt quick and two hours when you felt dull. Careers are energy systems. Do not pick a night-shift life if your log is empty after 9 p.m.

Worksheet 3 · Subject truth

Rank Physics, Chemistry, Maths, Biology, Accounts, History, and Language from 1 to 7 by enjoyment, not marks. Then rank them again by last exam marks. Where the two lists disagree, you have a story to investigate.

Worksheet 4 · Family map

List the careers your family keeps naming. Beside each, write their reason and your reason. If both columns are empty, the name is noise.

This image shows a single sheet of white paper with horizontal blue lines, similar to standard notebook paper. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Worksheet 5 · Money ceiling

Ask a parent or guardian the real annual fee they can pay without loans, with loans, and not at all. Write three numbers. A plan that needs a fourth number is a fantasy.

Worksheet 6 · Stream comparison

Draw four columns: PCM, PCB, Commerce, Arts. For each, write one profession, one exam, one fear, one cost. The stream with a fear you can live with is more useful than the stream with a glamour you cannot fund.

Worksheet 7 · Exam calendar

Pick three exams. Write notification month, form month, exam month, and result month. Leave a row for the official URL. Update it when the bulletin drops.

This image shows a single sheet of white paper with horizontal blue lines, similar to standard notebook paper. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Worksheet 8 · Mock score gate

Write the exam, today's mock score, the score you need by 1 December, and the score you need by 1 March. If December misses, the plan changes — you do not just 'try harder' in the same shape.

Worksheet 9 · Week grid

Seven rows, four columns: morning deep work, school, evening practice, sleep. Fill one real week. If sleep is the leftover, the plan will fail in January.

Worksheet 10 · Error log

After every mock, write five rows: question, concept, silly or conceptual, time lost, next drill. Review every Sunday. This page is worth more than a new book.

Worksheet 11 · Campus shortlist

Ten campuses. For each: fees, city, median placement or licence outcome, and one thing you dislike. Dislike is information.

Worksheet 12 · People to ask

Five humans who do the job you want. Write how you will reach them and one question that is not 'how is the salary?'.

Worksheet 13 · Internship hunt

Twenty firms or clinics. Status: not written, written, replied, rejected, offered. Start this in Class 12 winter even if the internship is next year.

[illegible]

Worksheet 14 · Skill stack

Three skills you will be able to demonstrate in 90 days (for example: Tally, Python, a published article, a 5 km run for NDA). Demonstration beats intention.

Worksheet 15 · Backup path

If the first exam fails, what is path B that still uses this year's work? Write it now so panic does not invent a worse one.

Worksheet 16 · Health ledger

Eyes, back, sleep, and one sport. A two-year exam plan that ignores the body is a plan to get sick in the last month.

Worksheet 17 · Phone rules

Write the hours the phone lives in another room. Write the one app you will delete during mocks. Social feeds are designed to beat your plan.

This image shows a blank sheet of white paper with horizontal blue lines, similar to notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Worksheet 18 · Scholarship hunt

Five schemes (NSP, state, campus, private). Deadline and documents. A scholarship is a part-time job with a form.

Worksheet 19 · Decision log

Date, choice, reasons, who was in the room, what you will review in six months. Future-you deserves a paper trail.

Worksheet 20 · First-year campus kit

If you get the seat: hostel, travel, laptop, and one adult you can call at 11 p.m. Write names, not vibes.

APPENDIX

Lists you can keep open

Copy these into your own notebook and update them when bulletins change.

Usual exam windows (confirm every year)

- JEE Main — often two sessions, winter and spring
- JEE Advanced — early summer, after Main
- NEET UG — early summer
- CUET UG — late spring / early summer
- CLAT — late year for the next academic cycle
- CA Foundation — mid-year and year-end windows
- NDA — two UPSC windows, then SSB
- NATA — multiple cycles; check the Council of Architecture
- NID / UCEED / NIFT — winter applications, winter–spring tests
- GATE — winter, for graduates
- CAT — late year, for graduates

Documents to keep in one folder

- Class 10 marksheet and passing certificate
- Class 12 admit card and later marksheet
- Photo ID that matches the application name exactly
- Passport photographs in the size the bulletin asks
- Category / EWS / PwD certificates if they apply, still valid
- Income certificate dated as required
- A scanned PDF set under 200 KB each before form season

A short letter to the tired student

If you are reading this at midnight after a mock that went badly, close the rank predictor. Sleep. Tomorrow you will do one page of error log and one walk. Careers are built on hundreds of ordinary Tuesdays, not on a single legendary night.

You are allowed to want a life that is not a brochure. You are allowed to want money. You are allowed to want service. You are not required to want them in the ratio your neighbourhood prefers.

When you are ready, open Vabishya, pick a starting qualification and a destination, and walk the steps. Then come back to worksheet 9 and put those steps on a week grid. That is the whole method.

Colophon

Set as a 6 × 9 inch digital edition. © 2026 Smruti Ranjan Sahoo. A Vabishya digital edition. Cover illustration commissioned for this ebook. Printed pages welcome; the file you downloaded after Razorpay checkout is yours to keep for personal study.

End of the planned sections. Remaining pages, if any, are extra lined planner sheets so the edition is a full 100 pages you can actually write in.

Open planner sheet 1

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 2

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 3

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 4

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 5

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 6

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.

Open planner sheet 7

Use this page for overflow notes, a second exam calendar, or a conversation you want to remember. Date the top line.
